

2025 IEEE International Conference on Blockchain (Blockchain) **Blockchain 2025**

Table of Contents

Message from the Steering Chairs	x
Message from the General Chairs	xii
Message from the Program Chairs	xiv
Organizing Committee	xvi
Program Committee	xvii
Sponsors	xix

Blockchain-1: Security, Privacy, and Trust

A Redactable Blockchain Architecture for Regulatory Compliance	1
<i>Christopher G. Harris (University of Northern Colorado, USA)</i>	
A Robust and Efficient Threshold Signature Scheme Based on ECDSA	7
<i>Dongsu Shen (XiangTan University, China), Yangning Zhou (XiangTan University, China), Benteng Deng (XiangTan University, China), Shujuan Tian (XiangTan University, China), and Yanchun Li (XiangTan University, China)</i>	
TaintSentinel: Path-Level Randomness Vulnerability Detection for Ethereum Smart Contracts	15
<i>Hadis Rezaei (University of Salerno, Italy), Ahmed Afif Monrat (Luleå University of Technology, Sweden), Andersson Karl (Luleå University of Technology, Sweden), and Palmieri Francesco (University of Salerno, Italy)</i>	
TransparenKey: TPM-Backed Open-Source Auditable Custody Wallet	23
<i>Ichiro Kuwahara (Crypto Garage, Inc., China)</i>	
Zero-Knowledge Shuffle Improvement in Ethereum Single Secret Leader Election	30
<i>Anders Malta Jakobsen (Aalborg University, Denmark), Oliver Holmgaard (Aalborg University, Denmark), Daniele Dell'Aglio (Aalborg University, Denmark), and Michele Albano (Aalborg University, Denmark)</i>	
Mapping Partisan Fault Lines Within DAOs	38
<i>Thomas Lloyd (South East Technological University, Rep. of Ireland), Daire O'Broin (South East Technological University, Rep. of Ireland), and Martin Harrigan (South East Technological University, Rep. of Ireland)</i>	

QuantumCry: The Engineering and Implementation of a Post-Quantum Ransomware	46
<i>Aniello Castiglione (University of Salerno, Italy), Jacopo Gennaro Esposito (University of Salerno, Italy), Vincenzo Loia (University of Salerno, Italy), Alessia Maffei (University of Salerno, Italy), Michele Nappi (University of Salerno, Italy), and Fabio Narducci (University of Salerno, Italy)</i>	

Blockchain-2: Applications and Services

Towards Verifiable-by-Design Smart Contracts: a Declarative Limit Order Books Implementation	56
<i>Srisht Fateh Singh (University of Toronto, Canada), Jeffrey Klinck (University of Toronto, Canada), Zissis Poulos (York University, Canada), Andreas Veneris (University of Toronto, Canada), Mohammad Fawaz (Independent Researcher, Canada), and Simon Roberts (Essential, Canada)</i>	
Decentralized Physical Infrastructure Networks: Backgrounds, Architectures, Open Issues, and Case Studies	65
<i>Jinwen Liang (The Hong Kong Polytechnic University, China), Jiannong Cao (The Hong Kong Polytechnic University, China), Bo Yang (China Mobile (Hong Kong) Innovation Research Institute, China), Dongbin Bai (The Hong Kong Polytechnic University, China), Hongbo Liu (The Hong Kong Polytechnic University, China), and Yinfeng Cao (The Hong Kong Polytechnic University, China)</i>	
Enhancing Liquidity in Blockchain-Based IoT Data Trading through Semi-Fungible Tokens	73
<i>Yueqi Su (Xi'an Jiaotong Liverpool University, China), Yuji Dong (Xi'an Jiaotong Liverpool University, China), and Jie Zhang (Xi'an Jiaotong Liverpool University, China)</i>	
MtDB: A Decentralized Multi-Tenant Database for Secure Data Sharing	79
<i>Showkot Hossain (University of Notre Dame, USA), Wenyi Tang (University of Notre Dame, USA), Changhao Chenli (Indiana Institute of Technology, USA), Haijian Sun (University of Georgia, USA), WenZhan Song (University of Georgia, USA), Seokki Lee (University of Cincinnati, USA), Mic Bowman (Intel Corporation, USA), and Taeho Jung (University of Notre Dame, USA)</i>	
Research and Implementation of Cross-Chain Transaction Consensus and Hierarchical Rollback Mechanism Based on Reputation System	87
<i>Yang Liu (Henan University of Technology, China), Han Li (Henan University of Technology, China), Fangchao Tian (Henan University of Technology, China), Feng Wang (Henan University of Technology, China), Xiangyu Cui (Henan University of Technology, China), and Min Zhang (Henan University of Technology, China)</i>	
Vwe2psTS: Supporting Oracle-Based Conditional Payments from Joint Addresses	93
<i>Panpan Han (Xidian University, China), Zheng Yan (Xidian University, China), Xueqin Liang (Xidian University, China), and Laurence T. Yang (Zhengzhou University, China)</i>	

PolyLink: A Blockchain Based Decentralized Edge AI Platform for LLM Inference	101
<i>Hongbo Liu (The Hong Kong Polytechnic University, China), Jiannong Cao (The Hong Kong Polytechnic University, China), Bo Yang (China Mobile (Hong Kong) Innovation Research Institute, China), Dongbin Bai (The Hong Kong Polytechnic University, China), Yinfeng Cao (The Hong Kong Polytechnic University, China), Xiaoming Shen (The Hong Kong Polytechnic University, China), Yanan Zhang (The Hong Kong Polytechnic University, China), Jinwen Liang (The Hong Kong Polytechnic University, China), Shan Jiang (Sun Yat-sen University, China), and Mingjin Zhang (The Hong Kong Polytechnic University, China)</i>	

Blockchain-3: New Architectures

A Time-Bound Signature Scheme for Blockchains	109
<i>Benjamin Marsh (Sei Labs; University of Portsmouth, UK) and Paolo Serafino (University of Portsmouth, UK)</i>	
A Blockchain-Based Access Control Architecture Using Non-Transferable NFTs and Gas-Efficient IPFS URI Management	117
<i>Yash Madhwal (Skolkovo Institute of Science and Technology, Russia), Pavel Chekriy (HSE University, Russia), and Yury Yanovich (Skolkovo Institute of Science and Technology, Russia; HSE University, Russia)</i>	
An Innovative NFT Approach to Ownership Assurance via Digital Content Similarity	125
<i>Kei Yamanaka (University of Tsukuba, Japan), Masahiro Mimura (Social Path Co., Ltd., Japan), and Kazumasa Omote (University of Tsukuba, Japan)</i>	
Breaking the Straggler Effect: a Relaxed Mempool for High-Throughput and Low-Latency DAG-Based BFT Consensus	133
<i>Woochang Jeong (POSTECH, South Korea) and Chanik Park (POSTECH, South Korea)</i>	
RzkFL: A Verifiable, Fast and Privacy-Preserving Framework for Federated Learning Inference Using Recursive Zero-Knowledge Proofs and on-Chain Verification	141
<i>Zeinab Alipanahloo (École de technologie supérieure, Canada), Michael Duchesne (T-RIZE Group, Canada), and Kaiwen Zhang (École de technologie supérieure, Canada)</i>	
Securing Blockchain-Based Distributed Learning for Heterogeneous Clients Through Knowledge Distillation and Zero-Knowledge Proofs	151
<i>Ghislain Nkamdjinn Njike (Hamburg University of Technology, Germany), Anh-Tu Hoang (Hamburg University of Technology, Germany), and Stefan Schulte (Hamburg University of Technology, Germany)</i>	
UPPR: Universal Privacy-Preserving Revocation	161
<i>Leandro Rometsch (Hamburg University of Technology, Germany), Philipp-Florens Lehwaldt (Technical University of Darmstadt, Germany), Anh-Tu Hoang (Hamburg University of Technology, Germany), Dominik Kaaser (Hamburg University of Technology, Germany), and Stefan Schulte (Hamburg University of Technology, Germany)</i>	

Blockchain-4: Scalability and Optimization

An AI-Powered Auto-Completion Tool for Solidity Smart Contracts	171
<i>Fabian Hensel (TU Hamburg, Germany), Avik Banerjee (TU Hamburg, Germany), Elmira Ebrahimi (TU Hamburg, Germany), and Stefan Schulte (TU Hamburg, Germany)</i>	
Dual-Key Verifiable Secure Aggregation for Federated Learning via Blockchain	181
<i>Yinghui Zhang (Xi'an University of Posts and Telecommunications, China), Yongchi Ma (Xi'an University of Posts and Telecommunications, China), Wei Liu (Xi'an University of Posts and Telecommunications, China), Yibo Pang (Xi'an University of Posts and Telecommunications, China), Yida Wang (Xi'an University of Posts and Telecommunications, China), and Huabing Yuan (Xi'an University of Posts and Telecommunications, China)</i>	
Enhancing Split Learning with Sharded and Blockchain-Enabled SplitFed Approaches	189
<i>Amirreza Sokhankhosh (University of Manitoba, Canada), Khalid Hassan (University of Manitoba, Canada), and Sara Rouhani (École de Technologie Supérieure, Canada)</i>	
Hermes: Scalable and Robust Structure-Aware Optimal Routing for Decentralized Exchanges	199
<i>Soroush Farokhnia (The Hong Kong University of Science and Technology, China), Sergei Novozhilov (The Hong Kong University of Science and Technology, China), Sanaz Safaei (Digikala, Iran), and Jiasi Shen (The Hong Kong University of Science and Technology, China)</i>	
Privacy-Preserving and Incentive-Driven Relay-Based Framework for Cross-Domain Blockchain Interoperability	207
<i>Saeed Moradi (University of Manitoba, Canada), Koosha Esmaeilzadeh Khorasani (University of Manitoba, Canada), and Sara Rouhani (École de technologie supérieure (ÉTS), Canada)</i>	
Revenue Optimization in Multi-Blockchain Mining: Adaptive Allocation and Scheduling Approaches	217
<i>Daewoong Cho (Queensland University of Technology, Australia), Gowri Ramachandran (Queensland University of Technology, Australia), Raja Jurdak (Queensland University of Technology, Australia), and Salil S. Kanhere (The University of New South Wales, Australia)</i>	
ZKPU: A Novel NVMe-Based Accelerator for Scaling Zero-Knowledge Proofs in Blockchain Systems	225
<i>Dingsen Shi (University of North Texas, USA), Chris Tsu (Initio Corporation, USA), Ying He (University of North Texas, USA), Alex Goss (University of Texas, USA), Donger Chen (University of North Texas, USA), Harry Fu (University of North Texas, USA), Yanbo Dai (University of North Texas, USA), and Song Fu (University of North Texas, USA)</i>	

Blockchain-5: IBTA Workshop

Rchain: A Universal and Efficient Redactable Blockchain Scheme	235
<i>Lingyuan yin (China Academy of Information and Communications Technology, China), Jianfeng Shi (China Academy of Information and Communications Technology, China), Bin Xie (China Academy of Information and Communications Technology, China), and Yang Liu (China Academy of Information and Communications Technology, China)</i>	

Research on Construction Methods of High-Quality Multimodal Datasets in Industrial Manufacturing	241
<i>Qiyang Wu (China Academy of Information and Communications Technology, China), Di Yao (Jiangsu Data Group Co., Ltd., China), Yang Liu (China Academy of Information and Communications Technology, China), Tingting Xu (China Academy of Information and Communications Technology, China), and Zihang Ying (China Academy of Information and Communications Technology, China)</i>	
SEFabric: Eliminating Runtime Conflicts in Permissioned Blockchain with Static Execution Control	247
<i>Sirui LYU (The University of Hong Kong, China Hong Kong, China) and Qinglin Pan (Chinese Academy of Sciences, China)</i>	
The Analysis of Data Annotation Operation Mechanisms in Industrial	253
<i>Tongtong Cheng (China Academy of Information and Communications Technology, China), Yang Liu (China Academy of Information and Communications Technology, China), Zihang Yin (China Academy of Information and Communications Technology, China), Tingting Xu (China Academy of Information and Communications Technology, China), Can Luo (China Academy of Information and Communications Technology, China), and Yuanchao Liu (China Academy of Information and Communications Technology, China)</i>	
Trusted Information Collection Mechanism for Short-Shelf-Life Food Supply Chains Based on Lightweight Blockchain	257
<i>Shengchuang Ren (Beijing Technology and Business University, China), Jiping Xu (Beijing Technology and Business University, China), Chenze Liu (Beijing Technology and Business University, China), Mingyang Chen (Beijing Technology and Business University, China), and Zhang Xin (Beijing Technology and Business University, China)</i>
